FARMBUDDY

Smart AI Farming Management System

- AI farm assistant
- Plant & crop disease checks
- Crop & animal planning
- Tasks & team management
- Inventory, sales & bookkeeping
- Maps & weather forecasts
- Farm shop & e-commerce — Buyer enquiries, not checkout

Plan · Scan · Manage · Sell

One farm. Too many things to keep track of.

PLANNING & WEATHER

What needs attention next?

Crop dates, animal care and plot notes are scattered. Checking local weather means switching tools.

TEAM & TASKS

Who is doing what?

Verbal instructions and chat messages make it hard to track jobs, supplies used and who can change records.

STOCK & MONEY

What is left, sold or spent?

Harvests, stock, sales and expenses are recorded separately, making season income and costs hard to follow.

FARM SHOP & BUYERS

Where can buyers see my products?

Without a shop link to post or share, farmers keep resending photos, prices and contact details.

PLANT CHECKS & ADVICE

What is wrong with this plant?

Identifying plants, checking possible disease signs and finding guidance that fits the farm can be difficult.

FIELD RECORDS & CONNECTIVITY

How do I record work in the field?

Notes and photos get separated. Weak internet interrupts updates, and typing slows fieldwork.

ONE CONNECTED FARM WORKSPACE

Plan. Check. Sell. With FarmBuddy.

Connected management & AI

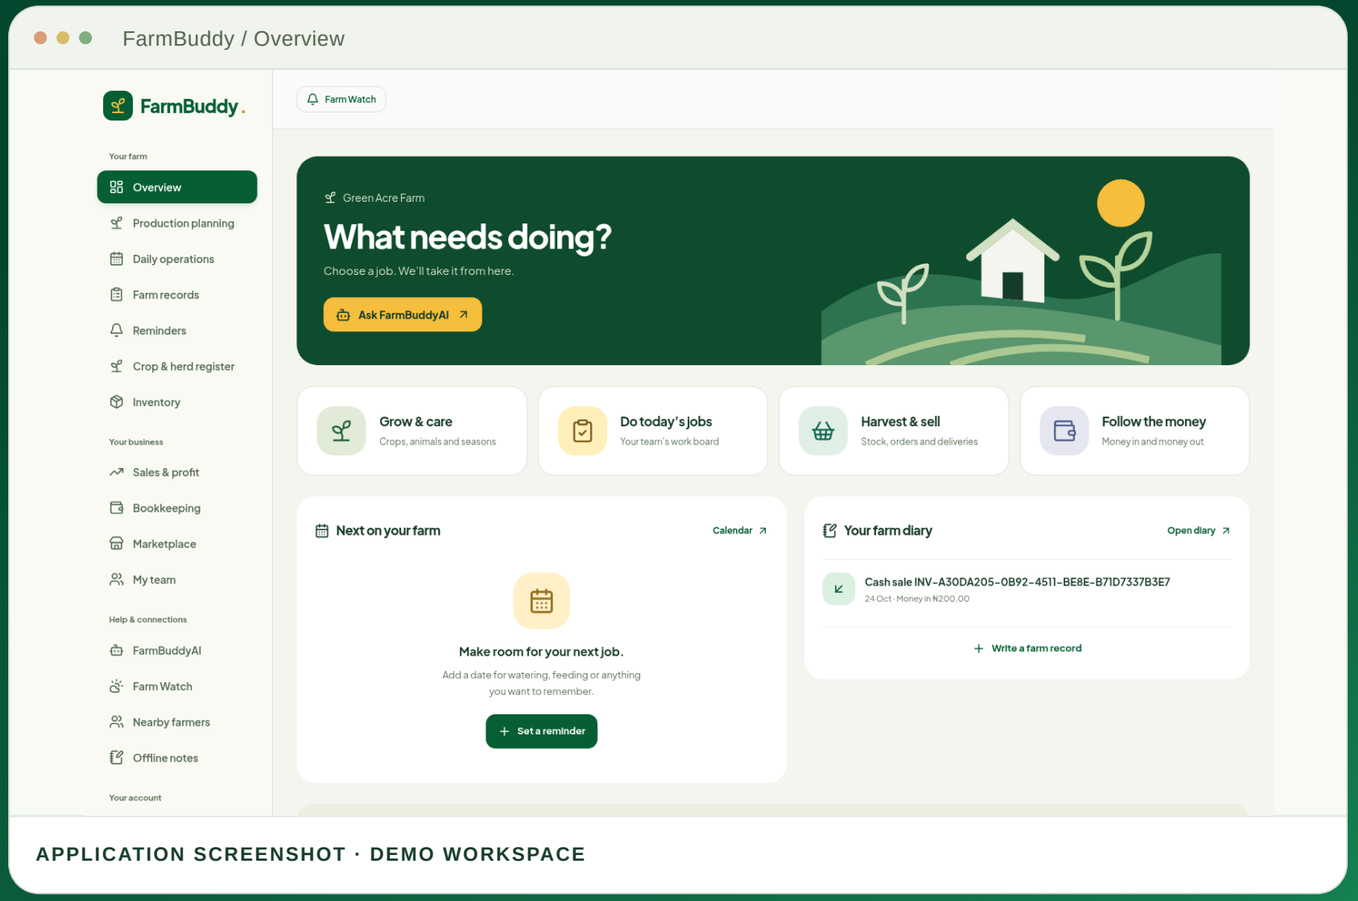

Keep plans, tasks, stock and sales together. Ask your AI Farm Buddy for guidance by text or voice, with selected farm records for context.

Plant & crop checks

Scan plant photos to identify a plant, explore possible disease matches and compare reference images. Suggestions, not a diagnosis.

E-commerce & your farm shop

List products in your own FarmBuddy shop. Post your shop link on social media or send it to buyers, who browse and contact you directly to arrange a sale.

Track your harvest from stock to sale.

ILLUSTRATIVE HARVEST AND SALE

01 **Harvest → stock**

Record what came in.

02 **Confirm paid sale**

Stock goes out once.

03 **Cashbook updated**

The sale adds income.

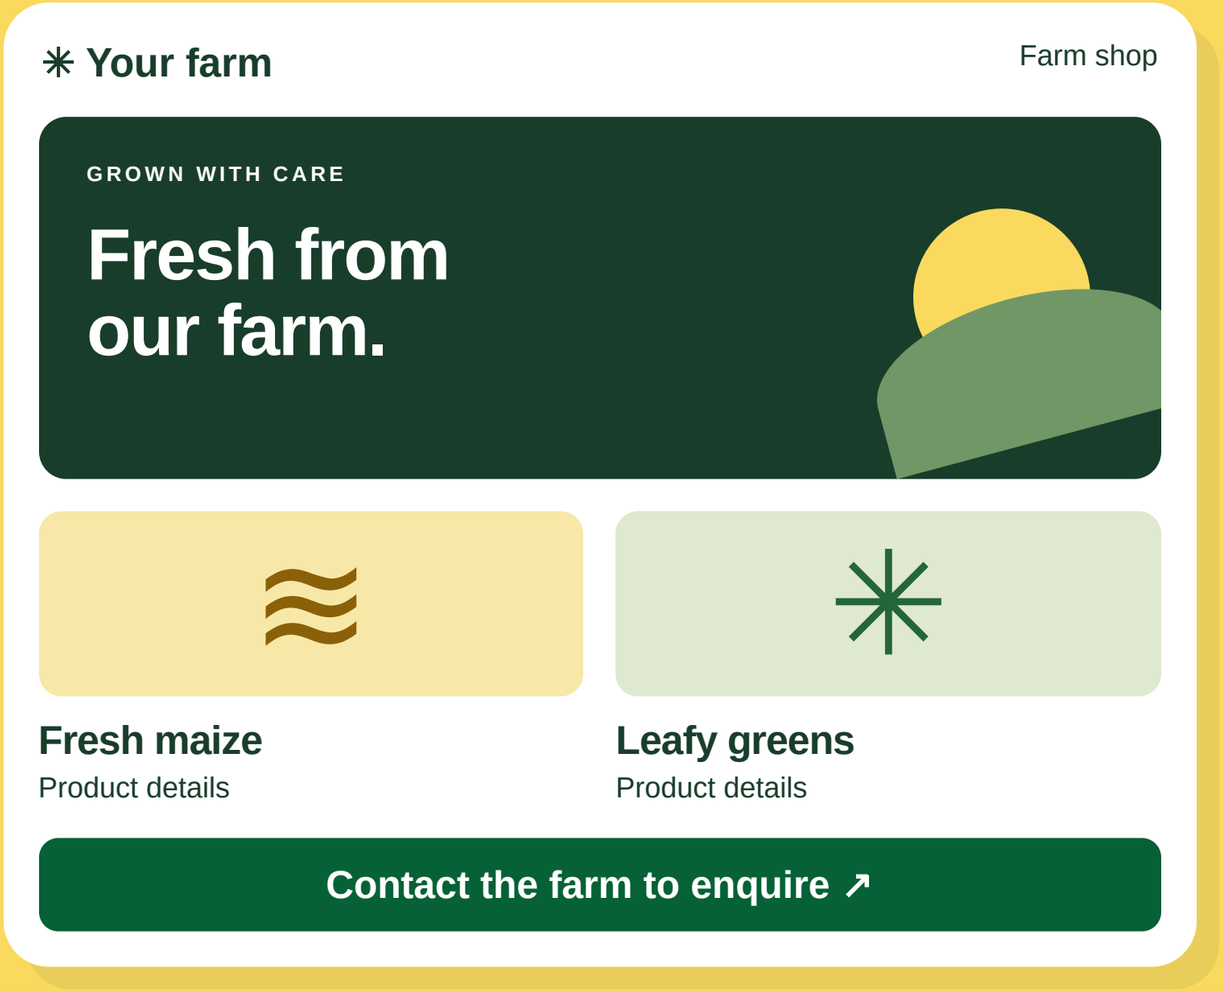

One confirmed cash sale. Stock and income recorded together.

Your farm becomes your shop.

Create your own farm shop.
Post your shop link on social media or send it directly to buyers.

Enquiries, not online checkout.

ILLUSTRATIVE STOREFRONT · SAMPLE PRODUCTS

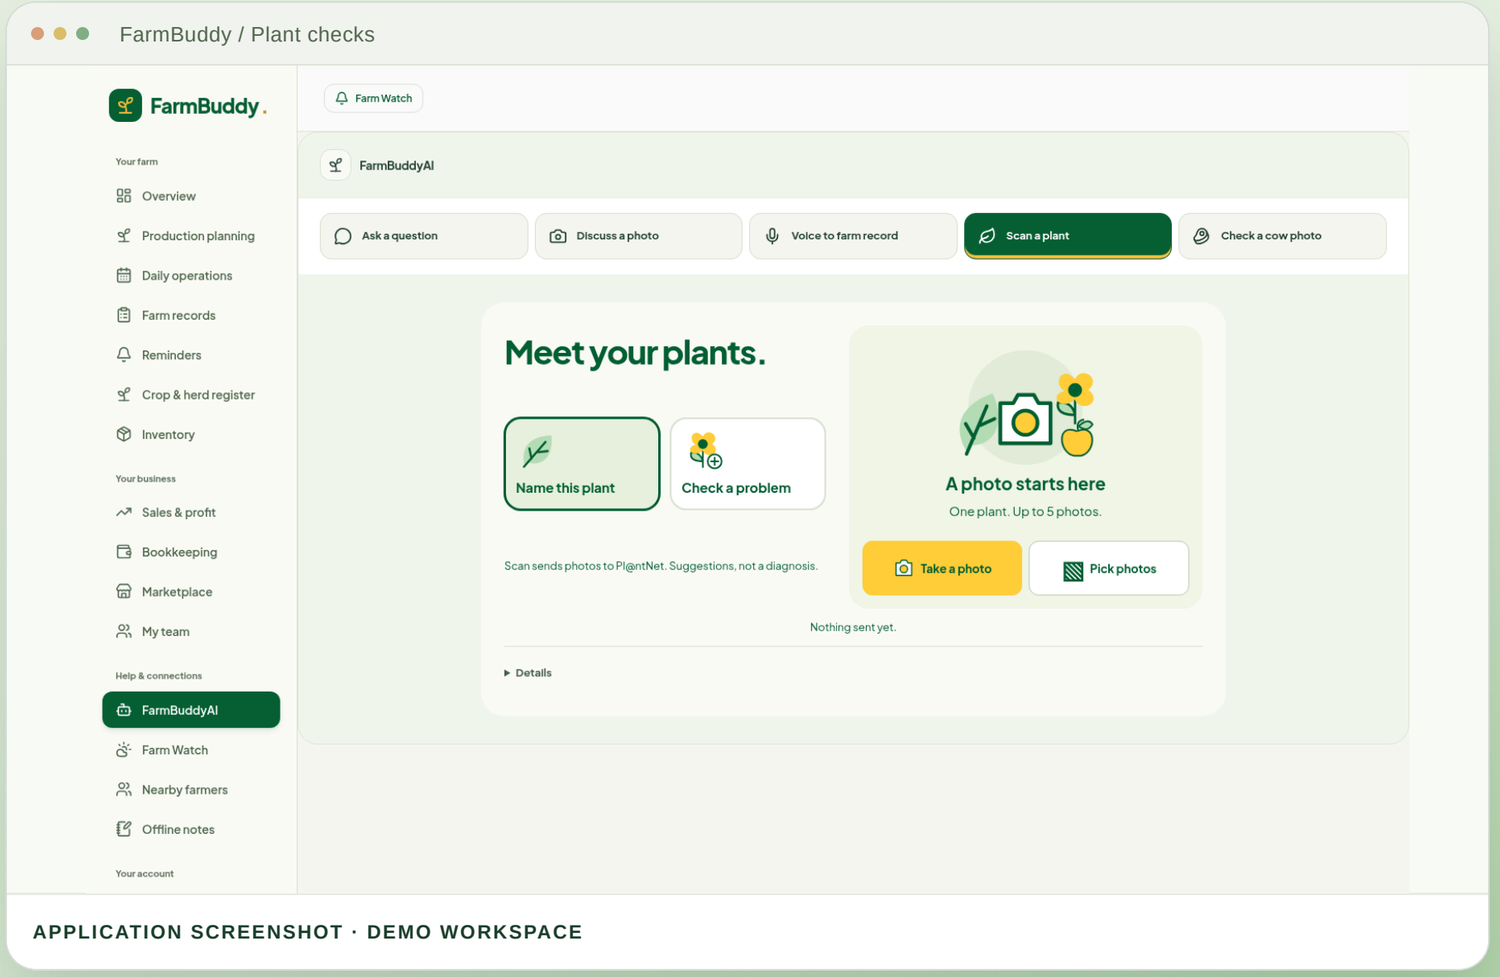

A CLOSER LOOK AT YOUR CROPS

Check your plants. Spot possible disease.

Identify a plant. Check a crop photo. Compare possible matches.

Plant identification **Crop disease checks**

Possible matches, not a diagnosis.
